Day -2 in power Bi

Today I learned about How to colour the charts for each category, fonts styles fonts colours, borders and Title.

Step 1: First, we need create the charts based on the problem or insights.

Step 2: After that, come to visualization and select the format visual.

Step 3: There we can see my option like x-axis, y-axis, gridlines, data labels, legend, columns.

Step 4: select any option and use the option based on your knowledge to visual the charts colourfully and understandable.
